POINTSHARP

Protect data
# in transit

Securely, easily and traceably

Cryptshare makes email better

Cryptshare by Pointsharp makes it easy for your staff to send encrypted email messages and attachments of any size at any time to internal and external recipients directly from your existing email system. There are no special software requirements for the recipients, no user accounts, no certificates or licences. Cryptshare makes it easy to communicate in complete privacy with everyone you need to, instantly, and at any time. Cryptshare makes your email suitable for the challenges of a modern business and will be adopted easily and quickly by your users.

Benefits with Cryptshare

Every day your company shares a wealth of data with customers, suppliers and business partners, and email sits at the heart of these communications. However, email is not suitable for the large files we so often share, and it lacks security. So what happens when your data is confidential or large?

Large files

Compliance

Traceability

Examples of Cryptshare in use

Fast and easy integration

Cryptshare offers several deployment options. Your server can be in-house, hosted or in the cloud - whatever suits you best. In daily operation, it requires very little time and all email users in your domains have access unless you decide to exclude them by policy. There is fast and easy integration into your email system available - no matter whether you use Microsoft Outlook, OWA
or HCL Notes.

- On-Premises
  (VM / Appliance)
- Hosting Partner
  (VM)
- Public Cloud
  (SaaS)
- Private Cloud
  (Microsoft Azure)

Your company, your rules

Cryptshare can be made available to your team very quickly and the powerful policy engine allows you to tailor the system according to your needs. From the central admin interface, there are numerous options to implement your own rules, such as password options, maximum retention time, and much more. You will certainly want to let your communication partners know that you are taking greater care of shared information. For this, the user interface can be fully customised to your company brand and notifications can be added.

"Cryptshare convinced us due to its straightforward administration and its easy to use Outlook add-in."
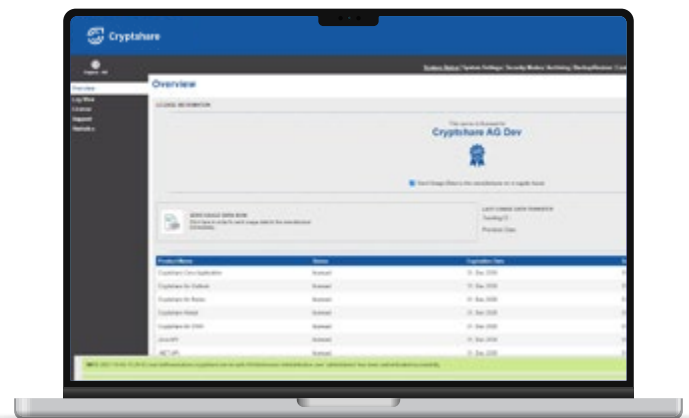

Dominik Scholl
ISO (RECARO Group)

Email made better

Cryptshare is flexible with fast and easy integration to MS Outlook, OWA and HCL Notes or through open interfaces to a variety of applications and business processes. Cryptshare is used widely in many industries from government to insurance, engineering to professional services, in schools and hospitals from the entire enterprise to a single department.

Pointsharp is a European cybersecurity company that enables organizations to secure data, identities and access in a user-friendly way. Because we believe easy to use security solutions lay the foundation for a modern digital workplace.

We deliver European made software and services that are made to support even the highest security and regulatory demands of large enterprise organizations and governmental institutions.

Our customers can be all around the world, often in markets requiring extra high levels of security, like the financial, governmental, industrial and defense sectors.

You can find our HQ in Stockholm, Sweden but we also have offices in Finland, Germany and the Netherlands.
