

Add API-powered, layered security to M365

Optimize your cloud email security to reduce phishing and malware threats by over 99%

Email is the primary entry point for cyber threats, including phishing, ransomware, and business email compromise (BEC) attacks.

Email is not only the number one attack vector favored by threat actors, but these adversaries are continuously developing their techniques, tactics, and procedures to try and gain entry to an organization. Microsoft is the de facto standard for email and collaboration. Threat

actors recognize this, and their attacks are designed to evade Microsoft's defenses. LevelBlue MailMarshal's Integrated Cloud offering optimizes Microsoft 365 protection within minutes by reducing phishing and malware threats by over 99% when layered on top of M365 without the need to change your MX record.

MailMarshal+M365 = world-class layered email security

MailMarshal's Integrated Cloud solution enhances M365's email security protections, layering on AI-powered, best-in class detection capabilities to block the most sophisticated email attacks before reaching

your inbox. By combining the proprietary defense filters in LevelBlue MailMarshal with the built-in security protections Microsoft 365 delivers unprecedented detection for the #1 attack vector – email.

Advanced Phishing and BEC Defense

Stop highly targeted email attacks, including credential phishing and executive impersonation.

AI-Powered Threat Detection

Five specialized proprietary AI/ML engines analyze behavioral patterns and threat intelligence to block evolving threats.

Insider Threat Protection

Detect and prevent threats originating from compromised accounts within your organization.

Seamless Integration with M365

Protect cloud-based email environments with layered security through an in-line and API deployment, requiring no MX record changes.

Enhanced Compliance and Data Protection

Prevent sensitive data loss and maintain regulatory compliance with DLP and encryption capabilities.

Future proof your email security

Take your protection to the next level and strengthen your environment beyond basic email protection. MailMarshal's Integrated Cloud solution provides a non-disruptive,

highly effective layered security approach that blocks the latest sophisticated threats before they reach your employees, reducing the risk of costly data breaches and financial loss.

LevelBlue MailMarshal Integrated Cloud mail flow

Benefits

- 99.99% phishing and malware capture rate
- Set up world-class email security protection for M365 in minutes
- 25+ years protecting organizations against phishing and BEC
- 0 Clients reported ransomware infection in 20+ years
- 0.001% spam false positives reducing business admin overheads
- Reduce burden on your security team
- Layers of proprietary AI-powered detection
- Decades of leadership in email security supported by LevelBlue SpiderLabs elite threat detection security team

Ease of implementation

- Protect emails without MX record change, ensuring no disruption in email flow
- Effortless and immediate deployment, optimized M365 protections out of the box
