

WithSecure™ Elements Exposure Management

See your organization through
the eyes of an attacker

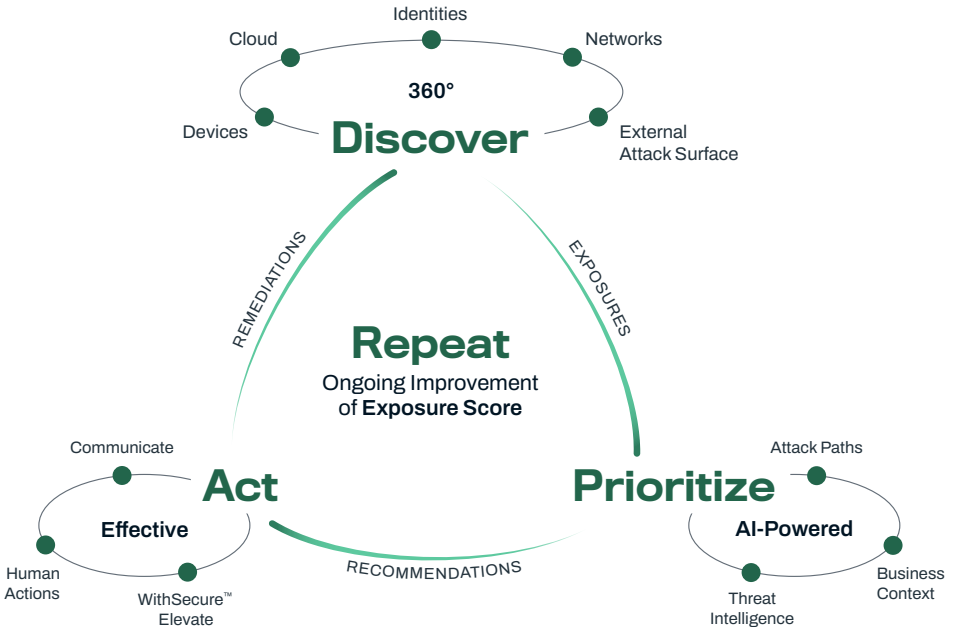

Discover and act on your digital exposures
before cyber criminals do

Organizations are increasingly dealing with the challenges of an unclear digital perimeter in the era of hybrid work, dynamic threat landscape, as well as risky assets like identities that are easily phished and stolen. WithSecure™ Elements Exposure Management (XM) is a continuous and proactive solution that predicts and prevents breaches against your company's assets and business operations. It provides visibility into your attack surface and enables the efficient remediation of its highest-impact exposures through a unified view, thanks to

our exposure scoring and AI-powered recommendations. The solution offers continuous recommendations on how to improve security posture based on asset exposure scores that utilize business context, attack path modeling, and dynamic threat intelligence data as their key inputs.

Get guidance for technical teams on how to take the most impactful remediation actions quickly. Make security risks easy to understand for business decision-makers and provide them with peace of mind.

360° view of your organization's cyber risks

1. Discover

Discover your digital perimeter and identify the most critical assets and identities.

2. Prioritize

Get AI-powered, actionable recommendations on what to prioritize based on integrated data from threat intelligence, attack paths and business context.

3. Act

Implement prioritized remediation actions to reduce your attack surface and decrease your business risk level, using our actionable guidance.
